

Inspection number: 2026021804 **Radon test number:** 202602180401
Client name: Robert Morrison **Client name:** _____
Phone: (508) 561-7553 **Phone:** _____
Email: rlm@octoberengineering.com **Email:** _____
Client Address: 2000 Level Hill Road, Palermo, ME 04354
Test property address: 358 High Street, Apt 1, Belfast, ME 04915
Test location: Living room **Test level:** First **Test purpose:** Rental
Test unit model: 1028 **Test unit serial #:** 207195018 **Unit calibrated:** Yes **Lab ID:** 207195018-021826
Start date: 02/18/2026 **Start time:** 01:12 pm **End date:** 02/20/2026 **End time:** 01:12 pm
Mitigation system present: None **Mitigation system type:** None
Test placed by: John Howard **Registration number:** PSP26801 **AARST ID:** 106515RT
Test retrieved by: John Howard **Registration number:** PSP26801 **AARST ID:** 106515RT
Radon measurement performed by: Breakwater Inspections **Registration number:** SPC268
Comments: A 48-hour short term was completed without apparent issues or incidents.
Below EPA action level - no mitigation recommended

Radon air test results

1.4

pCi/L

PURPOSE OF THIS INSPECTION REPORT

To provide a professional opinion of a structure's radon levels at the time of the test period, limited to the conditions identified in this report.

CALIBRATION

If a "Test unit model" and "Test unit serial number" were provided above, it means that an electronic testing device (known as a Continuous Radon Monitor, or "CRM") was used to conduct the radon air test. The CRM used is a type and model that has been approved by the State of Maine for use in conducting radon air tests. All CRMs that are used by Breakwater Inspections are calibrated annually by an approved laboratory or by the manufacturer. This calibration procedure is required by Maine State Law. The calibration certificates are available and will be furnished upon request. The calibration date of the unit is visible on the test report that accompanied this one (it is the one with the data log).

EPA AND MAINE'S EXPLANATION OF TEST RESULTS

Radon is the second leading cause of lung cancer, after smoking. The U.S. Environmental Protection Agency (EPA) and the Surgeon General strongly recommend taking further action when the home's radon test results are 4.0 pCi/l (picocuries per liter of air) or greater. Radon levels less than 4.0 pCi/l still pose a risk and in many cases may be reduced. The national average indoor radon level is about 1.3 pCi/l while outdoor radon levels average 0.4 pCi/l. The higher a home's radon level, the greater the health risk to you and your family. Smokers and former smokers are at especially high risk. EPA and Maine recommends that you use a registered mitigator to fix radon problems. You can call your state radon office to obtain information, including a list of Maine Registered Radon Mitigators who can fix or can help you develop a plan for fixing the radon problem.

NOTICE

Breakwater Inspections is certified by the Maine Department of Health and Human Services to perform certain radon services. The Maine Radon Registration Act requires anyone who provides any radon related service or product to the general public must be registered by the Department of Health and Human Services. You are entitled to evidence of registration from any person who provides such service or products. You are also entitled to a price list for services or products. All radon measurement data will be sent to the Department as required in the Act and will be kept confidential.

If you have any questions, comments, or complaints concerning persons who provide radon related services, please contact the Department of Health and Human Services at Radiation Program, State House Station 11, 386 Water Street, Augusta, Maine 04333-0011 Phone: 207-287-5698 or 1-800-232-0842 (In Maine only).

LIMITATIONS OF LIABILITY

Breakwater Inspections cannot guarantee the necessary conditions were maintained during the test period. There can be uncertainty with any radon measurement due to statistical variations and other factors such as changes in the weather and operation of the dwelling. While we and our agents make every effort to maintain the highest possible quality control and include checks and verification steps in our procedures, we make NO WARRANTY OF ANY KIND, EXPRESSED OR IMPLIED, for the consequences of erroneous test results. Breakwater Inspections nor its employees or agents shall not be liable under any claim, charge or demand, whether in contract, tort, or otherwise, for any and all loss, cost, charge, claim, demand, fee, or expense of any nature or kind arising out of, connected with, resulting from, or sustained as a result of any radon test.
